SPIROID HIGH TORQUE GEARING

INQUIRY
Customer provides clear application parameters & objectives

OPTIONS
Spiroid provides gear set options based on hob availability; torque & efficiency data is supplied for each option

SELECTION
Customer reviews torque & efficiency curves and selects best option

STATIC DIMENSIONS
Spiroid provides static dimensions for selected gear set; these dimensions are required by the cutting tool and cannot be altered

DETAILED PRINT
Customer utilizes static dimensions to develop detailed pinion and gear drawings, complete with all surrounding geometry and tolerances

QUOTE
Spiroid submits quotation which includes price, lead time and any associated NRE
